

1984 - Thirty-Six Years - 2020

Last Sunday's meeting was hosted by David Behnken at his home in Bloomsbury. Great setting for a club meeting – thanks David!

Many thanks to Dan Sellers for his accurate reporting, and more importantly, capturing the essence of the moment. Enjoy the following pix.

- Bob Norum

Mike Forte & David Glover catching up on all things Norton

One of several lunch breakout groups throughout the house

President George taking one of our host's CB750s for a quick spin down memory lane

Newly acquired Norton Electra awaiting attention. This bike is complete which is a rarity. Tin ware for this model is very scarce. Ya gotta love those grips!

Spotted on the way home

Historical Marker near intersection of Hunterdon Routes 579 & 614. The marker commemorates the life and times of “Liver Eating Johnson”, native son of New Jersey, whose life was popularized by Robert Redford in the movie “Jeremiah Johnson”.

Just turned onto Pittstown Road (Rt 615) following Route 579 through Pittstown. The lettering on the barn state “So This Is Pittstown”. Draw your own conclusions. Frankly, I think it’s a great marketing strategy.

Although our daily lives have changed dramatically these past few days, the one thing we can still do without restriction (at least for now) – go for a ride!

Cheers!
